- + SPECIAL FEATURES AND FUNCTIONALITIES

COLOP
MARKING SOLUTIONS

COLOP e-mark

The e-mark is an electronic and mobile (battery-powered) marking device to create and change own imprints and print them by an easy sideways movement.

Operated through an App on a mobile device or stationary computer, almost unlimited imprint designs, ready-to-use templates and special features are available. These include any text or image such as a company's logo, a date, time and numbering function, a QR- and barcode generator and many more.

Any absorbent surfaces such as paper, envelopes, books, cardboard or paper bags can easily be marked with the e-mark. In combination with the COLOP e-mark label sheets, even many other materials such as glass or metal can be labelled with the e-mark, which makes it not only a perfect organizational and office tool, but offers also great opportunities for personalization.

Art.nr	Modell
00000	Black
00001	White

COLOP e-mark protective case

The compact and lightweight case protects the e-mark against scratches, splash water and other external impacts.
